Professional Summary

Aspiring full-stack developer with hands-on experience in Java, Spring Boot, React, and SQL. Proven ability to build scalable web applications and AI-powered platforms. Strong foundation in computer science fundamentals and a passion for solving real-world problems through technology. Seeking Java Developer or Full Stack Developer roles to apply technical expertise and contribute to impactful projects.

Education

Dr.D.Y.Patil Prathistans College Of Engineering Salokhenager, Kolhapur **Sep.2021 – May 2025**

Bachelor of Technology in Computer Science - 8.0 GPA *Kolhapur, Maharastra*

Relevant Coursework

- Data Structures & Algorithm
- Database Management
- Web Development
- Computer Network

Experience

Kiran Academy **June 2024 – July 2024**

Sanyu Infotech Pvt Ltd Intern(Remote) ***Feb 2025-Aug 2025***

- Developed Java backend modules and REST APIs for scalable applications.
- Integrated React frontend components with Java/Spring Boot backend services.
- Worked with HTML, CSS, JavaScript, React, and MySQL to build full-stack features.

Projects

Resume Analyzer | *Java, React, MySQL, Spring Boot.* **November 2025**

- Built a full-stack Resume Analyzer application that automates the process of resume screening by allowing users to upload resumes and receive instant analysis results. The system extracts relevant information such as skills, education, and keywords, compares them with job-role requirements, and generates a match score. The tool helps recruiters save time by providing a clean interface to upload files, track results, and filter applicants efficiently.
- Implemented a scalable AI-powered Resume Screening Platform using React for the frontend and Spring Boot for backend services. It integrates secure file upload APIs, resume parsing logic, and an analysis engine that matches extracted skills and experiences with required job competencies.
- Designed a modular backend capable of handling multiple file formats, performing text extraction, and returning structured results via REST APIs. Frontend UI includes dynamic result visualization, applicant insights, and error-handling for failed uploads.

AI Content Generator | *Java, React, MySQL, Spring Boot .* **July 2025**

- The AI Content Generator, powered by Gemini AI, streamlines text creation for summaries, blogs, and captions. Built with React and a Java Spring Boot backend, it automates content generation, reducing manual effort by 40increasing efficiency. The system leverages advanced AI to generate high-quality, context-aware text with minimal user input.
- The Content Management module allows users to generate, edit, and customize AI-generated text. Gemini AI improves contextual relevance by 30%, ensuring better engagement. The intuitive dashboard provides real-time tracking, making it easy to manage content efficiently and boost productivity.
- With API-driven automation, users can create content 50% faster while ensuring accuracy and relevance. The platform integrates secure authentication via Spring Security, offering role-based access for creators and admins. Gemini AI enhances content structure, reducing errors by 35% and improving readability.

Technical Skills

Languages: Java, C, HTML/CSS, JavaScript, SQL.
Developer Tools: VS Code, Eclipse, IntelliJ IDEA, Vite, Postman, Git
Frontend-Technologies:HTML5, CSS3, Tailwind CSS, React.js.
Backend-Technologies: Java, Spring Boot, RESTful APIs, Maven, Hibernate, MySQL.

Certificates : Java Basic to Advance complete Issue By Aptech solutions July-2024
